DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 11/25/2003 has been entered.
2. Applicants' amendment dated 11/25/2003 has been received and entered. By the amendment, claims 44-48, 51-54, 70, 72-104 are now pending in the application.

Double Patenting

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. Claims 44-48, 51-54, 70, 72-104 stand rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 17 and 24 of U.S. Patent No. 5,834,327, as stated in the previous final office action..

Art Unit: 2871

Although claims 44, 72, 78, 84, 90, 95 and 100 are now amended, such amendment “said base film is formed between said resin and said driver circuit” is not sufficient to overcome its rejection in the previous Office Action.

In particular, Applicants contend that claims 17 and 24 of the ‘327 patent in no way described or suggest that the “underlying layer” is formed between “adhesive layer” and the “semiconductive integrated circuit” (amendment, page 12). The Examiner, again, respectfully disagrees with Applicants’ viewpoint and respectfully invited Applicants to review claim 17 and figures 5C, 7B which disclose the underlying layer (base film 53) being forming between the adhesive resin layer (resin 76) and the driver circuit (TFT formed over base film 53).

Accordingly, the double-patenting rejection stand.
